

Falls affect everyone young and old, and can be as a result of a multitude of factors from certain medications that cause drowsiness to the design of the environment. That's why we have carefully selected a wide range of products designed to prevent and detect falls such as bed rails to prevent falls from a bed and sensors that detect when an individual is on the move. If you're worried about falling or you look after someone who is at risk of falls we can provide you with the equipment and advice you need to stay safe at home. You'll find lots more products on our website www.homecare-products.co.uk.

Border Patrol

The home can be a risky environment for many people who live with health conditions such as dementia or poor mobility. This alarm system maintains their independence at home by alerting carers when a person enters a risky environment.

An electronic entrance-monitoring device, which creates an invisible infrared beam between the two units up to 20 metres apart. Alarms when someone moves through the beam.

- Easy to install
- Maintain independence
- Three volume level settings and alarm tones
- Two distance settings
- Easy to align with LED indicator lights on both units
- Each unit measures: 2.8"(w) x 1"(d) x 3.7"(h)
- Each unit uses: 1 x 9v battery (not included)
